

Figure 1 is a grayscale image of the NGC 6334 region, showing a dense field of stars and interstellar dust. A grid of red crosses marks the positions of 185 identified sources. The axes are labeled with Right Ascension (h m s) and Declination (° ' ). The Right Ascension ranges from 18h 28m 30s to 30s, and the Declination ranges from -11° 55' to -12° 25'.
