

This figure is a deep-field astronomical image of the galaxy cluster Abell 1835. The image is centered on the cluster core, which is marked by a red circle and a red crosshair. The axes are labeled 'Arc Seconds' and range from -30 to 30. A compass in the top right corner indicates the orientation, with 'N' for North and 'E' for East. The image shows several bright galaxies, including a large, bright yellowish-white galaxy at the center, and several smaller, bluer galaxies scattered throughout the field. The background is dark with some faint, diffuse light.
