

Figure 1 is a false-color image of the galaxy cluster Abell 1835. The image shows several galaxies against a dark background. A red circle with a crosshair marks the position of the primary radio source. Other galaxies are marked with red 'X's. A red arrow in the upper right corner indicates the orientation, with 'N' for North and 'E' for East. The axes are labeled 'Arc Seconds' and range from -30 to 30.
