

This figure is a color astronomical image showing a dense field of stars. The horizontal and vertical axes are both labeled 'Arc Seconds' and range from -30 to 30, with major tick marks every 10 units. A red circle with a central crosshair is positioned at approximately (0, 0). A bright yellow star is located at approximately (5, -8). A cyan star is located at approximately (-25, -22). In the upper right corner, there are orange arrows indicating the directions of North (N) and East (E). The background is dark with numerous small, faint stars visible.
