

Figure 1 is a grayscale image of the NGC 6334 region, showing a dense field of sources. The image is overlaid with a grid of Right Ascension (RA) and Declination (Dec) coordinates. The RA axis at the bottom ranges from 10h 47m 30s to 10h 43m 30s, and the Dec axis on the left ranges from 25° to -59° 55'. Numerous red crosses mark specific sources, many of which are labeled with numbers. The background shows a diffuse, irregularly shaped emission region.
