

Figure 1 is a false-color image of the galaxy cluster Abell 1835. The image shows a dense field of galaxies, with a prominent bright blue/white galaxy at the top center and a bright yellow/white galaxy at the bottom center. A red dashed line outlines a large, irregular region in the center. A red crosshair marks a point near the center. A red arrow points to the right, labeled 'E' for East. A yellow dotted line outlines a small region on the left. The axes are labeled 'Arc Seconds' and range from -30 to 30.
