

Figure 1 displays six stacked panels showing the time evolution of the count rate in different energy bands. The x-axis represents time in seconds after 2004-06-28 09:31:53 (UTC), ranging from 0 to 20000. The y-axis represents the rate in counts per second, ranging from -0.002 to 0.010. The panels are labeled as follows:

- Band 8: 200.0-12000.0 eV (black)
- Band 1: 200.0-500.0 eV (red)
- Band 2: 500.0-1000.0 eV (orange)
- Band 3: 1000.0-2000.0 eV (green)
- Band 4: 2000.0-4500.0 eV (blue)
- Band 5: 4500.0-12000.0 eV (purple)

Each panel shows data points with vertical error bars. The rates generally show a peak around 12000 seconds, corresponding to the maximum of the light curve shown in Figure 2.
