

This figure is a deep-field astronomical image of a galaxy cluster. The central region is dominated by a bright, yellowish-white elliptical source, likely the cluster's core or a massive elliptical galaxy. A red crosshair is superimposed on this central source, with its center at approximately (0, 0) in the coordinate system. The surrounding field is filled with numerous other galaxies of various sizes and colors, ranging from yellow to blue. The image is framed by a black border with white tick marks. The x-axis is labeled 'Arc Seconds' and ranges from 30 to -30. The y-axis is labeled 'Arc Seconds' and ranges from -30 to 30. In the upper right quadrant, there are orange arrows pointing towards the top right, labeled 'N' (North) and 'E' (East).
