

Figure 1 is a false-color image of the galaxy cluster Abell 1835. The image shows a central bright region with a red crosshair at the center. A yellow dashed line outlines a region of interest. Several other bright sources are visible, including a prominent one at the top right. Orientation is indicated by 'N' (North) and 'E' (East) arrows in the top right corner. The axes are labeled 'Arc Seconds' from -30 to 30.
