

Time series start (MJD): 54605.3551207

A line plot showing the power spectrum of the signal. The x-axis is labeled 'Frequency (Hz)' and has major ticks at 10^{-4} and 10^{-3} . The y-axis is labeled 'Power' and has major ticks at 0, 10, and 20. The plot shows a noisy signal with several peaks. The highest peak is at approximately 1.5×10^{-3} Hz with a power of about 11. Other significant peaks are at approximately 8×10^{-4} Hz (power ~9) and 4×10^{-4} Hz (power ~8).
