

Figure 1 shows a grayscale image of the M33 galaxy with a grid of Right Ascension (RA) and Declination (DEC) coordinates. The RA axis ranges from 05h 35m 30s to 00s, and the DEC axis ranges from 21° 45' to 22° 00'. A central region is marked with a white rectangle. Numerous red crosses mark specific objects, many of which are labeled with numbers. The background is a grayscale image of the galaxy, showing its spiral structure and central region.
