

Figure 1 is a color image of the galaxy cluster Abell 1656. The image shows a large, bright, yellowish-white central galaxy with a red circle and a crosshair marking its center. Several other galaxies are visible, including a bright blue one at the top right and a bright yellow one at the bottom left. A red arrow points to the right, labeled 'E' for East, and a red arrow points upwards, labeled 'N' for North. The axes are labeled 'Arc Seconds' and range from -30 to 30.
