

This astronomical image shows a galaxy cluster. The core is a bright, multi-colored region (cyan, green, yellow, red) located at approximately (15, -5) in arc seconds. A red circle with a crosshair marks a specific point at (0, 0). In the upper right, orange arrows indicate North (N) and East (E) directions. The axes are labeled 'Arc Seconds' and range from -30 to 30.
