

This figure is a deep-field astronomical image of a galaxy cluster, oriented with North (N) and East (E) indicated by red arrows in the upper right. The image is plotted on a coordinate system where both the horizontal and vertical axes are labeled 'Arc Seconds' and range from -30 to 30. The background is dark, filled with numerous small, distant galaxies. Several prominent galaxies are visible: a large, bright cyan galaxy in the upper right quadrant (approx. -18, 18); a large, bright yellow galaxy in the lower right quadrant (approx. -18, -20); and several other bright yellow and orange galaxies scattered throughout the field. A red circle with a central crosshair marks a specific location at approximately (0, 0) Arc Seconds.
