

A false-color astronomical image showing a field of galaxies. The background is black. Several bright, irregularly shaped objects are visible, primarily in shades of red and white. In the upper right quadrant, there is a large, bright, diffuse object. In the lower left, another bright object is visible. Near the center, there is a smaller, more compact object. Overlaid on the image are yellow dashed contour lines that trace the shapes of some of the brighter regions. A small red crosshair is located near the center of the image. The x-axis at the bottom is labeled 'Arc Seconds' and ranges from 30 on the left to -30 on the right. The y-axis on the left is also labeled 'Arc Seconds' and ranges from 30 at the top to -30 at the bottom.
