

A false-color astronomical image showing a star-forming region. The image is oriented with North (N) pointing towards the top right and East (E) pointing towards the top left, as indicated by the orientation arrows in the upper right. The axes are labeled in Arc Seconds, ranging from -30 to 30. A prominent bright yellow star is located in the upper left. A large, bright, yellowish-white cluster of stars is in the upper right. A red circle with a crosshair marks a specific location in the center. In the lower right, there is a bright, yellowish-white star. The background is dark with blue and green hues, indicating interstellar dust.
