

A false-color astronomical image showing a star-forming region. The image displays a dense field of stars and interstellar dust. A prominent cyan-colored diagonal line runs from the top-left towards the center. A bright, elongated cyan source is located near the top center. A bright red source is visible near the bottom center. A cyan source is located near the center-right. A red circle with a crosshair marks a specific location near the center. In the top-right corner, there is a small diagram with arrows labeled 'N' (North) and 'E' (East). The axes are labeled 'Arc Seconds' and range from -30 to 30.
