

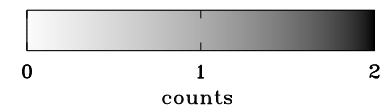

Figure 1 is a grayscale image of the NGC 6052 field, showing a dense distribution of stars. The image is overlaid with a grid of Right Ascension (RA) and Declination (Dec). The RA axis is labeled 'RIGHT ASCENSION' and ranges from 06h 59m to 54. The Dec axis is labeled 'DECLINATION' and ranges from -65° 50' to 20. Red crosses mark the positions of 272 stars, many of which are numbered. The background shows a dense field of stars and some diffuse emission.
